

For medical insurance reimbursement for a Mobius X8 knee or wrist brace, go through the following steps:

1. See a qualified healthcare provider/physician to obtain a prescription for a device
2. Call your insurance company to obtain the procedure to file for coverage under the terms of your plan (some providers in step #1 will do this for you)
3. Once approval has been obtained in step 2, purchase a pair of Mobius X8 knee braces or wrist brace from your local dealer, one of our online resources or on our website, making sure you get a receipt
4. Provide all information as required by your medical insurance provider obtained in step 2
5. You will need the HCPCS code below for your medical insurance provider to be able to classify coverage:

HCPCS (Healthcare Common Procedure Coding System) for our braces are as follows:

KNEE

L1845 - Knee orthosis, double upright, thigh and calf, with adjustable flexion and extension joint (unicentric or polycentric), medial-lateral and rotation control, with or without varus/valgus adjustment, prefabricated item that has been trimmed, bent molded, assembled, or otherwise customized to fit a specific patient by an individual with expertise.

WRIST

L3915 or L3916 – Wrist hand orthosis, includes one or more non-torsion joint(s), elastic bands, turnbuckles, may include soft interface, straps, prefabricated item that has been trimmed, bent, molded, assembled or otherwise customized to fit a specific patient by an individual with expertise.

Note: Procedures and the terms of coverage vary from company to company so it is highly recommended for the person submitting for reimbursement to contact their insurance provider to understand their specific procedures and coverage as well as to obtain pre-approval of the coverage based upon their prescription procedures and the HCPCS code. Mobius cannot guarantee coverage or reimbursement.

Many orthopedic clinics, surgeons, physical therapists and medical supply companies have successfully provided our products to their clients with positive results and have found that they provide needed support for various conditions unlike many others of traditional design.

We are also suppliers to two medical device companies who can be helpful in the process. They are as follows:

Hanger Clinics
Hangerclinic.com

Medequip
949-443-4414
